## THE REGENERATIVE EDGE:

### Where Design Meets Nurture

- A Space That Gives Back: We are building beyond sustainability. Our focus is Regeneration...using materials and systems that enhance the environment. This intentionality ensures your event is a truly ethical choice for your conscious clients.

- Biophilic Design: The entire venue is an active retreat... our design connects you to nature through high ceilings, abundant light, and a year-round glimpse of our evergreen eucalyptus crop.

- Movement and Sound: The energy of the land, visible through our windows, flows right into your session. The eucalyptus adds colour, sound, and gentle movement, creating the perfect backdrop for healing.

# The Lido

## TO SWIM OR NOT TO SWIM

We believe in transparency. And doing the right thing, we want to be honest...While The Lido (our natural swimming pond) is a beautiful feature of the landscape, we still have a few hoops to jump through with permissions. Therefore, public swimming is not permitted at this time. We promise to let you know as soon as that changes!

When we open in the Spring, we will have Space on the deck for lounging and dining, with changing rooms and an outdoor shower. There is plenty of space for A sauna and a cold Plunge pool.
What we can guarantee now is an abundance of unique, reliable features:

- Ultimate Flexibility: Large venue with sliding doors to create 1, 2, or 3 separate spaces.
- Logistics Handled: Catering kitchen access, sound system, mats, and cleaning assistance included.
- Regenerative Ethos: You are choosing an ethical space committed to healing the land.
